

Number of visits to physicians did not vary by region of residence

- 2,361,770 physician visits were made by 496,787 youth 12 to 24 years old in Alberta in 2008/09.
- Number of physician visits did not vary much by region of residence.
- Youth living in rural regions were slightly more likely to have no physician visits (26%) than youth living in large centres (23%).
- For more information, see our report *Physician Visits by Albertan Youth*.
