

Collaborative Data Linkage Project

Purpose: Integrate data across C5 to better understand client needs, service delivery, and agency strengths.

Background

The Collaborative Data Linkage Project is a partnership between PolicyWise and the C5 supported by the Stollery Charitable Foundation. This project aims to link and integrate data between the C5 agencies to enable closer integration of decision making, service evaluation and planning, and advocacy work.

Intended Outcomes

Linking data between the agencies will be a powerful tool that C5 can use to (1) increase awareness of client journeys across services and agencies, (2) better understand how programs complement each other, and (3) evaluate how to serve clients as a collaborative.

Objectives

Identify priorities and explore data across agencies

Link and integrate data across agencies

Analyze client journeys and services across agencies

Make recommendations for a shared intake process

Build capacity within agencies to continue linking, sharing, and using data
